

CLNTM

of South Florida

12" CLN Bender is a vertical bending brake, it allows the operator to bend left or right with out flipping the return around or lining up square lines. Rolling station allows the operator to form perfect radiuses.

Machine Capabilities

1. Return depth .5" to 12"
2. Return thickness .063" to .032" Aluminum
3. Letter height unlimited

Bending Letter Process

1. Place return in CLN Bender, line up the notch, step on the pneumatic powered foot pedal and follow bending instructions located on the return.

Features

1. Smooth ball bearing rotator design
2. Pneumatic clamping cylinder for hands free clamping operation
3. Bend right then left without flipping the return around
4. Three different radius sizes, located on the side of the machine.
